

Since 1957 Attbar, Inc. has produced a variety of water craft and other fiberglass products. Drawing upon years of boat building experience to build this exceptionally stable craft, Attbar introduced the first AquaPod in 1971. With a low profile that disappears into your surroundings, the AquaPod will get you more limits without sacrificing safety. The molded-in keel tracks straight to maneuver easily and skim through the water without getting snagged on aquatic vegetation or hung up when paddling shallow water.

To suit your needs, the AquaPod is available in 8, 10, or 12 foot lengths; or customize your AquaPod by choosing from three material grades. The SPORT is built using polyethylene plastic, the SEEKER is molded with our standard fiberglass construction, and the EXPLORER is constructed with light weight composites.

The standard finish of the AquaPod is a scuff sanded deck with a gloss hull in one of our standard colors, or on the SEEKER and EXPLORER you can specify a gloss deck at no extra charge. To achieve the camo finish on a SEEKER or EXPLORER, Attbar incorporates camouflage fabric into the laminate.

12' Explorer	60 LBS	465 LBS	144	40	98	21	13
12' Seeker	75 LBS	465 LBS	146	42	98	21	13

Every AquaPod is built with positive flotation foam in the bow and the stern.

- A Coast Guard Approved Personal Flotation Device must be used at all times when using the AquaPod.
- The AquaPod is classified by the Coast Guard as a kayak/canoe. However, the Pod is not designed for use in white water conditions.
- The AquaPod® is a low-profile boat, and while stable, it is intended to be used in a sitting or kneeling position.
- Never tow the AquaPod while it is occupied. Serious injury or death could result.
- It is the responsibility of the AquaPod user to learn, know and follow all boating safety rules and ensure that the boat is used for the intended purposes.

The AquaPod's basic design cannot be altered. Special requests for modifications to features or added options should be addressed to Attbar's General Manager. Specific modifications must be requested by the purchaser in writing and pre-approved before the order can be processed.

AquaPod® Boats

Explorer - 8

Length..... 8 ft
 Construction..... Explorer - our strongest and lightest
 Weight..... 40 lbs
 Color Options.... Green, dark brown Maduro, light Tobacco Brown, Gray, or Mossy Oak® camouflage
 Features..... 4 handles, 2 cleats, shock cords, towing eyebolt, and positive floatation foam

Explorer - 10

Length..... 10 ft
 Construction..... Explorer - our strongest and lightest
 Weight..... 50 lbs
 Color Options.... Green, dark brown Maduro, light Tobacco Brown, Gray, or Mossy Oak® camouflage
 Features..... 4 handles, 2 cleats, shock cords, towing eyebolt, and positive floatation foam

Explorer - 12

Length..... 12 ft
 Construction..... Explorer - our strongest and lightest
 Weight..... 60 lbs
 Color Options.... Green, dark brown Maduro, light Tobacco Brown, Gray, or Mossy Oak® camouflage
 Features..... 4 Handles, 2 cleats, shock cords, towing eyebolt, and positive floatation foam

Seeker - 10

Length..... 10 ft
 Construction..... Seeker - standard, durable fiberglass
 Weight..... 60 lbs
 Color Options.... Green, dark brown Maduro, light Tobacco Brown, Gray, or Mossy Oak® camouflage
 Features..... 2 Handles, 2 cleats, shock cords, and positive floatation foam

Seeker - 12

Length..... 12 ft
 Construction..... Seeker - standard, durable fiberglass
 Weight..... 70 lbs
 Color Options.... Green, dark brown Maduro, light Tobacco Brown, Gray, or Mossy Oak® camouflage
 Features..... 2 Handles, 2 cleats, shock cords, and positive floatation foam

Sport

Length..... 10 ft
 Construction..... Sport - tough rotomolded polyethylene plastic
 Weight..... 62 lbs
 Color Options.... Dark brown Maduro, Blue, or Yellow
 Features..... 2 Handles, 2 cleats, shock cords, and positive floatation foam
